

# Yes! You Can Access Windows applications on Google Chromebooks

## WITH ERICOM ACCESSNOW – GOOGLE CHROMEBOOKS OFFER A COMPLETE ENTERPRISE ACCESS PLATFORM!

Empower users to access all of their applications — Google Apps, and Windows applications and desktops. All you need is a Chromebook and an Internet connection.

Ericom delivers AccessNow — a pure HTML5 RDP Client, providing access to Windows applications and desktops running on Windows Terminal Services/RDS/VDI platforms directly from Chromebooks.

### THE CHROMEBOOK AND ACCESSNOW COMBINED SOLUTION

- Eliminates Windows PCs software management. Does not require Java, Flash, Silverlight, ActiveX, or any other underlying technology on the end-user device, significantly reducing IT overhead.
- Gives users the flexibility and mobility to access both their Web apps and Windows desktops directly from within the browser, wherever they are!

**Check out Ericom AccessNow for Chromebooks deployments at [www.Ericom.com/Newsroom](http://www.Ericom.com/Newsroom)**

- Quality Distribution, Inc. (QDI) extends the reach of 3000 Chromebooks with Ericom AccessNow >

### REAL BENEFITS!

AccessNow and Google Chromebooks are the ideal solution for education, government, healthcare, financial and other organizations that need to provide access to both Windows desktops and applications and Web apps:

- Simple, easy and inexpensive to maintain — does not require any infrastructure for deployment, upgrades or patches on the user's device — NO software installation or plug-ins required!
- Providing users with Chromebooks rather than PCs makes life very easy for system administrators and end-users alike
- Helps IT departments solve the Bring Your Own Device (BYOD)/CYOD/COPE challenge
- Work with your Web apps and any Windows applications — simultaneously!
- Special version enabling browser-based access to VMware View virtual desktops available

## HOW DOES ACCESSNOW WORK?

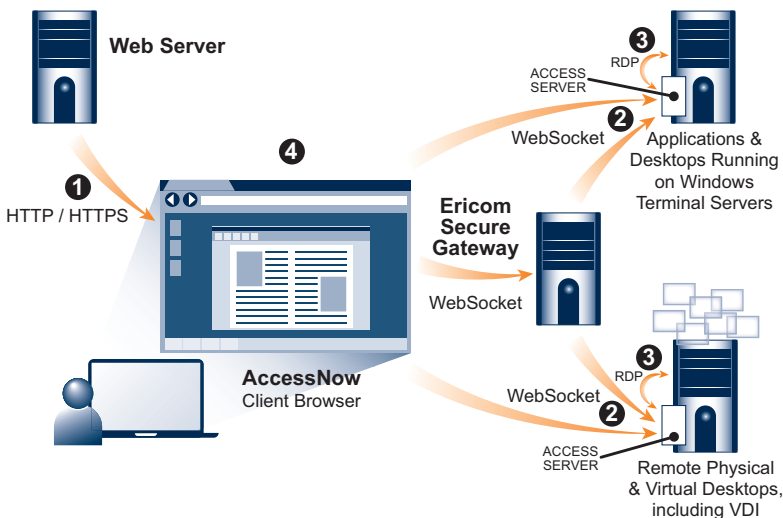

It's so simple! All the user needs is a Google Chromebook, and an internet connection.

- Open a web page
- Enter the address of the Ericom Access Server (the Terminal Server or VDI platform)
- Enter credentials
- Press 'Connect' — The desktop (or application) appears directly inside the browser window
- That's it!

Alternatively, Ericom AccessNow can be integrated into the organization's portal and by simply clicking on an icon the user will connect to their Windows apps or desktop.

Cliff Dixon, QDI, VP of IT commented, "Working with Cloud Sherpas and Ericom is allowing us to achieve everything we set out to accomplish with Chromebooks, including greater mobility and easy access for our employees to all the applications they need — both Google and Windows-based. Ericom was the first company to provide an HTML5 remote access solution, which finally made Chromebooks a viable option."

## ERICOM ACCESSNOW COMPONENTS

1. End-user navigates to the AccessNow URL to start the connection.
2. Client connects to Access Server using WebSockets — Access Server is usually installed on RDP host itself.
3. Access Server translates WebSocket communication to/from RDP
4. Remote Windows desktop/application UI is displayed inside the browser window

NOTE: Optionally, client connects to Access Server through Ericom Secure Gateway
