

# Access Windows Desktops & Applications from *Anywhere* Using *Any Device!*

## With Ericom AccessNow™ and just a web browser, instantly transform any mobile device, tablet or PC into a secure, enhanced remote desktop client

Empower users with the mobility and flexibility to access Windows desktops and applications hosted on Windows Terminal Services/RDS/VDI/physical workstations - from Windows PCs, Mac, Linux, iPad/iPhone, Android, Google Chromebook – even locked down workstations!

Ericom AccessNow high performance HTML5 RDP client for accessing hosted Windows applications and desktops **runs entirely inside the browser**, using only standard web technologies.

### Real Benefits!

- **Lowers IT overhead, dramatically reducing Windows PC software management load.** NO installation of client software or plug-ins (e.g., Java, Flash, Silverlight, ActiveX) is required on the user device.
- **Intuitive.** Uses any HTML5-compatible browser, including Chrome, Edge, Firefox, IE, Opera Safari and others, without installing any client software.
- **Great user experience.** With built-in acceleration, Ericom AccessNow performs as well – and looks as good – as a native RDP client.
- **Works seamlessly in managed environments.** Control who has access to what, while ensuring users can access all the systems, resources and business tools they need to be productive.
- **Automatic keyboard display** enables keyboard access whenever needed, for an improved user experience.
- **Secure data.** With Ericom AccessNow unique web browser-based approach, sensitive corporate data remains secure with no information left on the user device when the sessions ends.
- **Nothing complicated.** Runs out-of-the-box, without requiring any customization, installation or configuration.
- **Supports BYOD** (Bring Your Own Device) initiatives. Gives users the flexibility to access their working apps and desktops from their own personal device without requiring IT support of the device.
- **Ericom Secure Gateway** (Free option). Enables road warriors or home office workers to securely connect to internal resources from outside the firewall – no VPN is required.

### How does Ericom AccessNow work?

It's simple! All you need is a web browser and an internet connection.

- Open a web page
- Enter the address of your Ericom Access Server
- Enter your log-in credentials
- That's it!

## Ericom AccessNow Components

1. End-user navigates to the Ericom AccessNow URL to start the connection.
2. Client connects to Ericom Access Server using WebSockets - Ericom Access Server is usually installed on RDP host itself.
3. Ericom Access Server translates WebSocket communication to/from RDP.
4. Remote Windows desktop/application UI is displayed inside the browser window.

**NOTE:** Optionally, client connects to Ericom Access Server through Ericom Secure Gateway.
